

DREAM TRIP TO SPAIN

Overview & Purpose

Through this project the students will explore the different costs associated with travel as well as plan a trip with a budgeted amount of money.

Education Standards

Math

4.1 (A)/5.1 (A) apply math in everyday situations

4.1 (B)/5.1 (B) use problem solving skills

Materials Needed

- Musical Sprouts: Spain Travel Project: Direct link: <http://bit.ly/35GvS2v>
(Shared as Presentation PDF file or QR Code Card - both in Resource folder)
- Vacation Budget Sheet **per student**
- Vacation Planning Sheet per team
- Website Resource Handout per team

Student Objectives

Students will research, gather information and explore the different costs associated with planning a vacation.

Students will explore the different costs associated with travel as well as plan a trip with a budgeted amount of money.

Activity

Students will research, gather information and explore the different costs associated with planning a trip to Spain. The students will be required to use any resources available to them to plan their trip. Through this project students will be required to plan several details of their trip. Students will have to stay within a budget of \$6,000. Students will complete their Vacation Budget Sheet and document their travel in a digital photo book (PowerPoint/Google Sheets/iMovie, etc).

Extension

The students will use multimedia skills to make a creative presentation to showcase their dream vacation. Alternate trips can be calculated by giving the students other guidelines to follow. For example, a specific attraction sight or National/State Park, or the teacher can create "Detours" during students planning (ex. flat tire will cost students \$100, emergency roadside assistance \$50).
