

MUSICAL SPROUTS

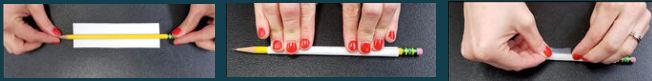

Rocket Exploration

Explore the world of science through rocketry.

STRAW PAPER ROCKETS

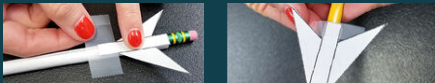

Step 1:

Carefully cut out the rectangle. Wrap it tightly around a pencil forming a tube. Secure it with a piece of tape. This will become the body of the rocket.

Step 2:

Carefully cut out the two fin units. Tape it on the base of the tube creating a "fin sandwich".

Step 3:

Create a nose for your rocket by twisting the tip of the tube opposite the side of the fins.

Step 4:

Remove the pencil and replace it with a straw. Blow gently and watch your rocket soar!
